CLINITEX®
A RANGE OF WIPES, CLEANSING & JANITORIAL PRODUCTS FOR HEALTHCARE PROFESSIONALS
Clinitex®
PROFESSIONAL
CARE PRODUCTS

Clinitex® is the registered brand name of the healthcare products range manufactured and distributed by Techtex.

Clinitex® is a comprehensive range of patient cleansing products, developed for use in hospitals, residential care and domestic environments.

Consisting of dry wipes, pre-moistened wipes and skin cleansing products, the Clinitex® range offers carers, their patients and other users a complete range of healthcare solutions.

Manufactured in the UK, Clinitex® products have been carefully assembled using the highest quality and most appropriate raw materials available.

CLINITEX® PURE

Softer, stronger and more absorbent. A natural, dry patient wipe that cares for the patient and the environment.

Environmental Benefits:
- Made from natural, non genetically modified, pesticide free, non chlorine bleached 100% cotton.
- Packaged in a re-usable, easy access dispenser made from recycled cardboard and water based inks (unless selected in polythene dispenser).
- Fully biodegradable.

Technical Performance:
- Hypoallergenic.
- Superior wet and dry cleaning performance.
- Intrinsic fibre mass that provides excellent dirt pick up.
- Higher liquid absorptive capacity.
- Rapid liquid wicking rate.
- Increased liquid absorbency.
“Clinitex® Skin Cleansing” is a range of pre-moistened wipes and foams designed for adult use. The generous sized wipes are impregnated with a pH balanced formulation, containing added emollients to moisturise and promote healthy skin.

The Clinitex® Skin Cleansing range has been dermatologically tested and is alcohol, lanolin and paraben free so can be used on all areas of the body.

Suitable for patients and carers alike, the range offers a quick solution to skin cleansing in the absence of readily available washing facilities.

Clinitex® Skin Cleansing is available in a variety of formats. The handy sized R350 poly pack dispenser can be supplied to individual patients, whereas the R360, dispenser bucket provides a more economical solution to skin cleansing and can be utilised within a multi user living area or ward.

COLOUR CODES FOR HYGIENE
On 10 January 2007 the National Patient Safety Agency announced details of a national colour coding system for cleaning materials (cloths, mops, gloves, aprons).

Please find below an illustration of the system.
Techtex Cleanroom offers an extensive range of wipes for clean room and critical area contamination control. Products are converted and packaged under stringent conditions in our clean room which is validated in accordance with ISO 14644-1 (1999).

The demand for even greater contamination control in environments such as operating theatres, pharmaceutical laboratories and biotechnology companies has created a requirement for absorbent, low particle shedding fabrics that are an effective part of in-house contamination control. Techtex Cleanroom produces a wide range of sterile and non-sterile wet and dry wipes for the cleaning of these critical areas.
